Providing a comprehensive quality approach to Joint Replacement
OUR GOALS FOR YOU

- Understand your disease process and surgery.
- Comfortable with your joint center experience.
- Have all of your questions answered.
- Return to your own home after 3 days.
- Have FUN!
WHAT IS YOUR GOAL?

GOLF?
WALKING?
VACATION WITH YOUR FAMILY?
Who is your Coach?

IT IS VERY IMPORTANT THAT YOUR COACH BE PRESENT AT EACH THERAPY SESSION AND DURING GRADUATION ON FRIDAY.
OSTEOARTHRITIS

• Most common type of arthritis.
• It occurs when the cartilage covering the end of the bones gradually wears away.
• Osteoarthritis can occur in any joint.
• Osteoarthritis is sometimes called degenerative joint disease.
NORMAL AND ABNORMAL XRAYS
HOW DO MY KNEE JOINTS WORK?

Knee:

– Hinge type of joint
– Muscles and ligaments provide support
– Cartilage between bones provide cushion
UNDERSTANDING YOUR SURGERY

Mercy Joint Replacement Center
TOTAL KNEE REPLACEMENT
**How do my hip joints work?**

**Hip:**

- Ball and socket type of joint
- Smooth cartilage cover the ends of the bone
- Synovium surrounds the joint space and acts to lubricate the joint
TOTAL HIP REPLACEMENT

SPECIFIC RISKS OF HIP & KNEE SURGERY

Knee
- Blood Clot
- Dislocation
- Instability

Hip
- Blood Clot
- Dislocation
- Changes in leg length
- Intra-operative fracture
Preventing Infections

- No shaving of legs 4 days before surgery.

- Begin using antibacterial soap daily for 2 wks. before surgery.

- Cleanse the hip/knee with special soap for a total of 3 showers including the night before & morning of surgery.

- See your dentist on a regular basis
Home Preparation

- Check for tripping hazards (remove cords & throw rugs)
- Dresser and cabinet items
- Cordless phone
- Stairs
- Shower/bath setup
- Designate a chair to spend most of your time
- May need to arrange sleeping on main level for 1-2 weeks
- Have nightlights in rooms and hallways
- Meal preparation and outdoor work
ITEMS NEEDED
Packing for Your Joint Cruise

What to Bring on your Cruise:

- Your smile, patience and determination
- A positive attitude
- 3-4 outfits of loose-fitting clothing (T-shirts and shorts, sweatpants or loungewear with elastic waistbands or drawstrings work best). We encourage wearing shorts if you are having knee surgery. Both men and women will attend group therapy, so plan for modesty.
- A sweater or long-sleeved sweatshirt to layer for warmth.
- 4-5 pairs of underwear
- Tennis shoes or flat rubber sole shoes – loose fitting (no backless shoes, please).
- Personal hygiene toiletries, such as toothpaste, deodorant, shampoo, and electric razor.
Also bring:

✓ Your walker
✓ “Hip Kit” if you have one
✓ Eyeglass, contact lens and denture cases, Bi-pap/C-pap machine
✓ Your Living Will / Advanced Medical Directive if you have one
✓ Your Patient Navigator Notebook
ITEMS TO LEAVE AT HOME

✓ Credit Cards, Checks or Cash
✓ Jewelry
✓ Valuables of any kind
COUNTDOWN TO SURGERY

- Stop taking arthritis medications, aspirins and blood thinners, vitamins and minerals as directed by your physician.
- Follow the instructions you received at your PAT visit.
COUNTDOWN TO SURGERY

- Bathe with special soap you received at Pre Anesthesia appointment
- Do not eat or drink after midnight before your surgery, including gum, mints, candy and smokeless tobacco.
Morning of surgery

- Take medications with a small sip of water (only the ones you have been instructed to take).
- Brush your teeth. You may brush your teeth and rinse with water, but do not swallow the water.
- Bathe with special soap. DO NOT use perfumes or any scented lotions.
- Do not wear make-up or nail polish (except clear).
ARRIVING TO MERCY

- Check in at Registration Desk on 2nd floor by accessing the elevator or escalator.
- Verify information/ID Bracelet
- Nurse reviews all medical history
- Prepare for surgery- hospital gown, remove dentures and glasses or contacts
- Pre-op area
- Family waiting area
THE MORNING OF SURGERY

- You should have a friend or family member to accompany you.
- You should designate one person to be contacted when your surgery has been completed.
- Your personal items need to be left in the car until after surgery.
A member of your anesthesia team will meet with you before surgery.

Please inform them if you have ever had any problems with anesthesia.

After examining you and discussing your medical history and desires, the best anesthetic plan will be determined for you.

Total Knee Replacement patients will receive a pre-operative block.
GOING INTO SURGERY

- Cared for by a team of nurses, technicians, surgeons, and anesthesiologists
- Total surgery times will vary
- Recovery Room - special unit to recover from anesthesia - approximately 1-1/2 hrs
- Transfer to the Joint Replacement Center to begin your journey to wellness
Day of Surgery

- Clear liquid diet; Advance as tolerated.
- Deep breathing and coughing exercises, incentive spirometer.
- Physical Therapy will come and evaluate you at the bedside the afternoon of your surgery.
- Knee patients-CPM after dinner
YOUR RECOVERY SCHEDULE

• GROUP THERAPY AT 10:00

• STAY IN CHAIR FOR THE DAY EXCEPT WHEN IN THERAPY

• REST PERIOD FROM 12:00-1:30

• GROUP THERAPY AT 2:00

• DISCHARGE AFTER PM THERAPY
Fall Prevention

“Do not get up without the help of staff!”
- Communication is very important
- Share with nurses any pain you experience
- Be specific- use the pain scale (0-10)
- Take medicine before therapy sessions
- Don’t expect to be pain free
Techniques to help you manage your pain after surgery:

• It is important to start moving as soon as possible after surgery. It may hurt to move, but moving and being active will help lessen your pain over time.

• By focusing your attention on something other than your pain, you can relax and stop thinking about it. Playing cards or games, visiting with friends and family, watching television, reading, listening to music...
The skills you will learn prior to discharge:

- Get in and out of bed.
- Get up and down from chair and toilet.
- Get in and out of shower by yourself.
- Walk with walker on level surface for 300 feet.
- Be able to go up and down stairs if you have them at home.
- Get dressed.
- Perform your exercise program on your own.
DISCHARGE NEEDS

You can expect:

- A prescription for pain medication
- A prescription for blood thinner
- Written instructions from your surgeon
- An appointment with your surgeon
- Set-up with Home Health
Recovering at Home

Keys to Success:

 ✓ DO NOT go long periods of time without moving
 ✓ DO NOT drive a car until cleared to do so
 ✓ DO NOT take tub bath or swim until cleared to do so
 ✓ DO continue your exercise program as prescribed
 ✓ DO take pain medication 30 minutes before therapy
 ✓ DO continue ankle pump exercises when sitting
 ✓ DO take longer walks when cleared to do so
EXERCISES

Turn to Exercise Guide section of your Patient Navigator.
