The IHI Leadership Alliance

IHI Leadership Alliance members at the program’s launch meeting on October 7, 2014
Patients, families, providers, and communities are looking for health care leaders with a new level of courage and optimism. Leaders who believe that now, perhaps more than ever before, we must change the dialogue about health care from one that focuses on reimbursement and regulation — to one that makes the pursuit of health and healing paramount. Leaders who accelerate needed changes in ways that embolden everyone in their organizations to operate at the vanguard of system performance while bringing meaning and joy to the health care workforce.

The IHI Leadership Alliance is a dynamic collaboration of health system executives and teams who share a mission to work with one another as well as in partnership with our patients, workforces, and communities to deliver on the full promise of the IHI Triple Aim. We are a learning community characterized by generosity, curiosity, and courage.

Together we are…

- **United for Change**: We are a rising, collective voice for system change and believe the focus of attention should shift from industry preoccupations to the pursuit of health and healing — confident that such a shift will inspire fundamentally better care and outcomes for people and communities.

- **Driven by Collaboration**: We believe that breakthrough system performance and health outcomes are possible when health care systems share promising practices and fuel new innovations in partnership with civic, health, and social service organizations.

- **Grounded in the Triple Aim**: Examples of health care systems delivering flawlessly on the Triple Aim serve as our beacons of learning for wider adoption and improvements.

- **Focused on Results and Action**: From incubating new ideas to implementing new approaches to inspiring new policies, we are moving from talking to doing, from aspiring to achieving.

**Four key levers…**

In pursuit of our mission and vision, we are focused on four key levers that support a portfolio of collaborative work:

1. **Aims and Measures**: Identifying and developing the measures by which we will assess our progress

2. **Radical Redesign**: Harvesting and testing promising approaches to care redesign based on a new set of guiding principles

3. **Leadership**: Ensuring we build capability, nurture joy and meaning in work, and lead organizations toward our bold and courageous vision

4. **Collective Voice**: Offering a united and amplified voice to shape national dialogues around health and health care

The Institute for Healthcare Improvement (IHI), with its rich history of improving health and health care for more than 25 years, is uniquely positioned to convene forward-thinking health system leaders in this bold, collaborative health system leaders in this bold, collaborative learning community; to partner with them to address the most urgent challenges facing health care organizations; to innovate new models to achieve the Triple Aim of better care, better health, and lower cost; and to support leaders and their organizations in driving demonstrable and unprecedented results.
